PROFILE

Experienced Frontend Developer with nearly 5 years of expertise in crafting high-performance, user-friendly web applications. Skilled in advanced CSS techniques, UI/UX design, and delivering responsive, visually appealing interfaces. Recently gained experience with React, Next.js, and TypeScript, enhancing project scalability and interactivity. Passionate about creating seamless user experiences and consistently improving web performance. Looking forward to leveraging my

design and development skills in a dynamic role.

Skills

- Frontend Programming
- JavaScript
- TypeScript
- React
- Next
- CSS
- SCSS
- SASS
- Bootstrap (v3, v4, v5)
- Tailwind CSS
- PrimeReact
- Headless UI
- Shadcn/UI
- PrimeFlex
- Framer Motion
- GitHub
- GitLab
- Git
- User Interface Design (UI)
- User Experience Design (UX)
- Prototyping &
- Wireframing
- Figma
- Zeplin
- Balsamiq
- Adobe Illustrator
- Sketch
- Inkscape
- Adobe Photoshop
- Responsive Web Design
- Cross-Browser Compatibility
- Problem Solving
- Slack, Jira
- Microsoft Teams
- Trello
- Agile, Scrum, Kanban
- Basic Python, Django
- Laravel
- Basic in Php, Yii 2
- Internet Design
- HTML5
- Webpack, Vite

EMPLOYMENT HISTORY

Frontend Web Engineer at Lightning Step Technologies, Plovdiv

August 2024 — October 2024

- Specialized in developing scalable, high-performance web applications using HTML5, CSS3, JavaScript, TypeScript, Next.js, and React.
- Created clean, maintainable codebases using Sass and utility-first frameworks like Tailwind CSS and PrimeFlex for rapid UI development.
- Built dynamic, reusable components using Bootstrap, PrimeReact, Headless UI, and Shadcn/UI, enhancing project scalability and maintainability.

- Implemented engaging animations using Framer Motion, enriching user experience and interactivity.
- Collaborated with cross-functional teams to translate design concepts into fully functional, visually appealing applications.
- **Achievements:** Contributed to a major projects delivery within a tight 2-month timeline by streamlining the component architecture and UI implementation. Developed a reusable component library, reducing future project development time.
- **Skills:** HTML5 · CSS3 & Advanced CSS · Vanilla JavaScript · TypeScript · React.js · Next.js · Sass · Bootstrap (v3, v4, v5) · Tailwind CSS · PrimeReact · Headless UI · Shadcn/UI · PrimeFlex · Framer Motion · Version Control (Git)
- **Summary:** Over 4 years and 11 months of experience in frontend engineering, advanced styling techniques now specializing in React, Next.js. Skilled in both development and design, with a proven track record of delivering high-quality, user-centric web solutions.

Frontend Developer & UI/UX Designer at Lightning Step Technologies, Plovdiv

July 2022 — August 2024

- In this role, I contributed significantly to both frontend development and UI/UX design. I designed responsive web interfaces and crafted high-quality user experiences using tools like Figma, Balsamiq, Illustrator, Sketch, and Inkscape. I closely collaborated with stakeholders to ensure that the visual elements were aligned with business goals and user needs.
- I worked on web projects that involved using Laravel for backend development while utilizing Microsoft Teams and Jira for project management and team communication. This role also gave me the opportunity to strengthen my skills in version control (Git) and problem-solving, especially in cross-functional environments where backend and frontend needed seamless integration.

Frontend Web Developer at ZenCharts, Plovdiv

December 2019 — June 2022

In this role, I worked extensively on frontend development, utilizing HTML5, CSS3, and advanced CSS techniques. I created highly responsive and visually appealing web interfaces, working with vanilla JavaScript, jQuery, and Sass. My work primarily involved building and designing user-friendly and aesthetically pleasing web applications, where I collaborated closely with backend teams to ensure smooth integration of design and functionality.

I supported frontend tasks and integration by leveraging basic knowledge of Yii2. This experience helped me build a solid understanding of frontend-backend collaboration, particularly using Git for version control, Slack for communication, and other collaboration tools.

EDUCATION

Master, University of food technologies, Plovdiv

September 2012 – February 2018

- Activities and societies:
 - Active participant in the Computer Science Society
 - Competed in various programming contests
 - Involved in collaborative software projects led by students
 - Attended conferences and training sessions on cutting-edge technologies
- Completed a Master in Computer Science. The program covered key areas such as programming, data structures and algorithms, database systems, and software engineering. Through rigorous coursework and practical projects, I developed understanding of computational theory, system design, and application development.
- The curriculum provided experience in building software solutions, managing complex data systems, and applying best practices in software design and development. My studies also mentioned machine learning, cloud computing, and cybersecurity, allowing me to explore specializations within the field of computer science.
- Throughout the program, I participated actively in various extracurricular activities and some coding challenges, which helped enhance my technical skills and foster a collaborative spirit. This education laid a foundation for my career in software engineering, equipping me with the skills necessary to excel in technology-driven environments.

Software University (SoftUni), Sofia

December 2019 – July 2022

- Activities and societies:
 - Member of the JavaScript Web Development track
 - Participated in coding challenges
 - Engaged in peer programming and study groups
 - Attended workshops on modern JavaScript frameworks and libraries
- The JavaScript Web Developer program at Software University (SoftUni) provided me with comprehensive knowledge and practical skills necessary for a career as a software engineer, focusing on the latest JavaScript technologies. The curriculum included professional modules with a strong emphasis on hands-on learning, covering both frontend and backend JavaScript development.
- Throughout the program, I gained expertise in HTML, CSS, JavaScript, and TypeScript, along with various frameworks and libraries like React, Node.js, and Express.js. The coursework involved building complex web applications, learning best practices in web development, and enhancing my problem-solving abilities through continuous practical exercises and projects.

Elmir (Charlie) Tanev

+359899914923

- The program concluded with a series of practical exams that tested my proficiency in developing modern web solutions, ultimately equipping me with the skills needed to excel in a professional setting and contribute effectively to software engineering teams.

HOBBIES

I am deeply passionate about front-end development and committed to continuous learning and professional growth. Beyond my career, I maintain a healthy and balanced lifestyle through activities such as cooking, yoga, regular gym sessions, and hiking. Since 2019, I have actively kept up with industry trends to stay at the forefront of modern web technologies. Additionally, I prioritize daily reading, particularly in the evenings, as a way to unwind and explore diverse topics outside of work, broadening my perspective and enriching my personal interests.
